DETAILED ACTION

Election/Restrictions

1. Claims 1 and 6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 17 April 2006.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the structure of Claims 2-5 and 9 including, *inter-alia*, an apparatus or a method that analyzes pulse waves by filtering the signal with multiple filters, determines a rising point time for each filtered signal, and determines a proper rising point time from among the respective rising point times.

Ogura (US Patent 6379309) discloses a pulse wave analyzing apparatus that comprises a pulse wave sensor and a single filter (column 7, lines 33-39) and may be used to determine the rising point time of a pulse wave (column 9, lines 58-59). However, Ogura does not disclose using multiple filters and selecting a proper rising point of a pulse wave from among the rising point times determined by each of the filtered signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
